*Hello, my name is Shalin Mano, and I'm a 1<sup>st</sup> Batch PGCDS student at ABIDAT (2022-23). I had a fantastic opportunity - thanks to ABIDAT to participate in this programme with BGU in Israel. I learned a lot from the BGU Faculty, and I was fascinated by their research and the innovations they made in the field. The BGU Team did a great job of educating us on the most recent areas of study and are fantastic at answering our questions either directly or via email.*

*Yes, this was a fantastic opportunity for me to learn from the best people in their respective fields. Last, but not least, I am admitted to BGU, Israel where I will complete my Master's Degree in Desert Studies with a full fellowship under Prof. Shimon Rachmilevitch. I'm excited to see what lies ahead.....*
